LED INDICATOR SCOPE UPGRADE

for Dri-Scope Aid® Tracker Scope Cabinets

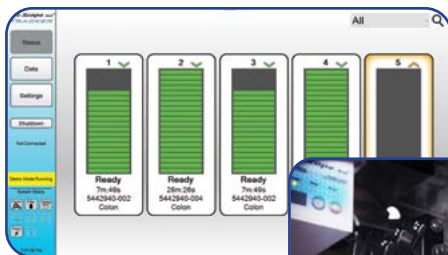

This smart scope cabinet upgrade provides improved staff efficiency by utilizing Harloff's proprietary colored LED lighting helping your staff with identification, hanging and retrieval. Optimize your staff's time by upgrading your Smart/Tracker scope cabinet with Harloff's LED Indicator system.

Features:

- Simplifies scope placement and improves the hanging and retrieval time of endoscopes by your staff by up to 25%
- The scope holder's proprietary LED system syncs the LED color with the Tracker tablet on the door's touchpad.
- Reduces human error and scope identification mistakes
- Improves the efficiency and accelerates the speed of the endoscopy process
- Virtually eliminates the possibility of using expired scopes
- Easily ID scopes without having to check serial numbers

Immediately identify the requested scope by LED lighting color. Reduce scope repair expenses with FIFO system.

Dri-Scope Aid® Tracker System Benefits:

- Digital display maintains a list of scopes by drying status
- Intelligent automated scheduler for checked-in scopes
- Scope tracker maintains records of drying events, user access, check-ins and more with color touch screen access
- Various adjustable timing options including drying, pre-drying and venting time settings, hang time limits, endoscope removal/load delay timing and options unique to each endoscope
