

THE PTS-1000KL

PATIENT TRANSFER SCALE

The PTS-1000KL is a transfer board with a built-in medical scale that provides a weight measurement when transferring a patient. All departments can benefit from the Patient Transfer Scale, particularly Stroke Units, the Emergency Room, ICU, and Radiology.

Designed by Clinicians for Clinicians the Patient Transfer Scale weighs critical or immobile patients instantly and accurately helping shorten door-to-needle times. It offers a superior alternative to other weighing equipment, such as in-bed scales, that are often not calibrated or inaccurate.

The scale is light and portable and can be utilized as part of an existing patient transfer process when a weight is needed, and will not disrupt the patient flow process.

THERE'S STRENGTH IN OUR NUMBERS.

When you add up the numbers, it's not surprising that Health o meter® Professional Scales is the industry-leading name in medical scales.
