

495 / 4951 Mechanical Stationary Wheelchair Scales

The model 495 and 4951 stationary mechanical beam scales provide the economical answer to the weighing of patients in wheelchairs. Its quality is inherited from Detecto's eye-level physician scale and incorporates a precision die cast weigh beam which is easily read from either side. The weigh beam is located at a height above the platform where the patient or attendant can perform the weighing operation. The ramp is removable and is covered with a non-skid mat. The die-cast, dual-sided beam is graduated in 1/4 lb (or .1 kg) increments for easy readability.

Customers specializing in the care of nonambulatory patients provided information which was transferred into features and benefits of these scales, evident the first time you use the scale!

Precision die-cast weighbeam is readable from both sides

495/4951 Specifications	
Capacity:	495 400 lb x 4 oz 4951 180 kg x 100 g
Shipping Weight:	194 lb / 88 kg
Platform:	30" x 26" / 762mm x 660 mm with nonskid removable mat.
