M33 - Hand Skeleton Model with Ligaments and Carpal Tunnel

This 3 part hand skeleton model shows the anatomical detail of the ligaments and tendons found in the hand, wrist, and lower forearm. The interosseous membrane between the radius and ulna is shown along with the bones of the hand. The flexor retinaculum is removable from the hand skeleton. In addition there is a removable portion that can be fitted on the back of the hand model. This portion features the clinically important structures of the carpal tunnel such as the flexor retinaculum, mediane nerve, and tendons of the hand.

M33/1 - Hand Skeleton Model with Ligaments and Muscles

The bones, muscles, tendons, ligaments, nerves, arteries, and veins are all featured in this high quality 4 part model of the hand and lower forearm. The dorsal side of the hand shows the extensor muscles as well as portions of the tendons at the wrist as they pass under the extensor retinaculum. The palmar face of the hand is represented in three layers, the first two removable to allow detailed study of the deeper anatomical layer of the hand. In addition clinically important structures such as the median nerve and superficial palmar arterial arch can be explored in detail in the hand model. The deepest anatomical layer allows for study of the intrinsic muscles and deep palmar arterial arch in addition to other details of the anatomy of the hand.

- A Ligaments of the right hand, dorsal view
- B Ligaments of the right hand, palmar view
- C Carpal tunnel region of the right hand, palmar view
- D Carpal tunnel insert, oblique view from the direction of the fingertips
- E Ligaments of the right wrist, palmar view
- F Dorsum of hand (dorsum manus) and extensor side of fingers of right hand
- G Right palm of the hand (palma manus) with palmar aponeurosis
- H Right palm of the hand (palma manus) without fasciae and palmar aponeurosis
- I Superficial palmar arch of the right hand. Fasciae, palmar aponeurosis and flexor retinaculum have been removed.
- J Deep palmar arterial arch of the right hand
